179. Largest Number

Solved ●

Medium   🏷 Topics   📊 Companies

Given a list of non-negative integers `nums`, arrange them such that they form the largest number and return it.

Since the result may be very large, so you need to return a string instead of an integer.

Example 1:

> **Input:** nums = [10,2]
> **Output:** "210"

Example 2:

> **Input:** nums = [3,30,34,5,9]
> **Output:** "9534330"

Constraints:

- `1 <= nums.length <= 100`
- `0 <= nums[i] <= 10`^{9}
